

THE OPERATING SYSTEM FOR TRAVEL

Powering OTAs · Travel Agents · DMCs with AI and Crypto native infrastructure

The Problem

The travel industry, seemingly stuck in the early 2000s, runs on fragmented, disparate legacy infrastructure

Fragmented APIs

OTAs and agents juggle 10+ disconnected GDS, hotel, and airline APIs with no unified layer, impacting margins, burning time and engineering budget

No Intelligence Layer

Manual booking workflows lack AI-driven recommendations, dynamic itinerary creation, dynamic pricing, blockchain enabled payments, advanced data analytics, and post-booking optimization

Underserved B2B Market

Travel Agents and DMCs are forced onto consumer platforms — there's no enterprise-grade B2B tool built specifically for them

The Solution

Kanoe.ai replaces fragmentation with a single intelligent B2B travel infrastructure, connecting OTAs, ITAs, and DMCs to all available inventory through one powerful layer.

Unified API Layer

One integration, all inventory

Smart Dashboard

Real-time analytics engine & booking management

AI Co-pilot

Intelligent pricing & recommendations, with optional real-time avatar interface

Post-Booking Optimizer

Dynamic pricing engine, auto-rebook when prices drop

**One
Platform.**

**All Travel
Businesses.**

**Powered
by AI.**

Market Opportunity

\$11.4T

Global Travel TAM by 2028

Post-pandemic high surpassed

\$780B

B2B Travel Technology TAM

Growing at 12.4% CAGR

62%

Agents use 3+ disconnected tools

Prime for consolidation

Target Customer Segments

OTAs

Online Travel Agents seeking API aggregation, AI tooling, and B2B dashboards

ITAs

Independent Travel Agents needing professional enterprise-grade platform access

DMCs

Destination Management Companies handling complex multi-product bookings

Product Overview

01

B2B Dashboard

Booking mgmt, revenue analytics, client CRM, and performance metrics in one responsive interface

02

Unified Travel API

Single integration to Amadeus, HotelsPro, Travolutionary, and all major inventory sources

03

AI Travel Intelligence

Smart pricing, demand forecasting, post-booking price monitoring with auto-rebooking

04

Partner Revenue Tools

White-label, commission tracking, dynamic pricing engine, advanced data analytics, and crypto-native payment rails

PLATFORM LAYERS

incl. Stablecoin

Competitive Landscape

Kanoe.ai is the only AI-native, full-stack B2B travel platform

Platform	B2B Focus	AI Layer	Crypto Pay	Post-Book Opt.	White Label
Expedia / Booking.com	Partial	Limited	No	No	No
RateHawk / Beroni	Yes	Basic	No	No	Partial
Amadeus GDS	Yes	Legacy	No	No	No
Pruvo (standalone)	Partial	Pricing only	No	Yes	No
Kanoe.ai	Yes	Full Stack	Yes	Yes	Yes

Kanoe.ai is the only platform combining B2B focus, full-stack AI, dynamic itineraries, post-booking optimization, and crypto-native payments in one unified solution.

Business Model

PaaS Subscription & VAS

Monthly/annual platform fees tiered by volume for OTAs and ITAs

40%

Transaction Commission

Per-booking margin on hotel, flight, and activity inventory (0.5–3%)

35%

API Access Fees

Usage-based pricing for DMC and white-label partners

15%

Premium AI Add-ons and Data Monetisation

Price monitoring, AI advisor, dynamic pricing modules, and alt data licensing

10%

Gross Margin: 68–72% · LTV:CAC > 5x · Payback < 18–24mo

A Fifth Revenue Stream – Alt Data

Beyond platform fees, Kanoe generates a structurally differentiated revenue layer by monetising the proprietary travel data asset it accumulates at scale, creating and augmenting unique datasets.

Proprietary Data Asset

Every booking, search, and behaviour signal on the platform creates a compounding, proprietary dataset unavailable elsewhere — growing in value with every transaction.

Data Licensing Revenue

Anonymised travel datasets licensed to institutional investors, hedge funds, and enterprise clients. Consumer intent & behaviour signals sold as alternative data packages.

Structural Moat

Data licensing revenues are high-margin, recurring, and platform-agnostic. As transaction volume scales, data becomes an increasingly defensible second business within Kanoe.

The following two slides detail Kanoe's Alternative Data strategy and the Unified Data infrastructure that powers it.

Alternative Data Market in Travel

KEY DATA SOURCES

Mobile Location

Footfall & travel patterns

Social Sentiment

Reviews & trend signals

Transaction Data

Credit card spend flows

IoT Sensor Data

From smart hotels & airports

USE CASES

Demand Forecasting & Dynamic Pricing

Destination Trend Detection

Customer Segmentation & Personalisation

MARKET TRENDS

Growing Data Partnerships

Ecosystem consolidation accelerating

Privacy-First Data Usage

GDPR-aligned, consent-based flows

Real-Time Analytics

Sub-second insight pipelines

Unified Data Strategy and Monetisation

Non-traditional datasets - mobility, social, transactional - powering the next generation of travel intelligence. Alt data is a \$18 billion market (2025) at 60% CAGR, growing to \$136 billion by 2030.

INTERNAL PLATFORM

Unified Data Platform

Single source of truth integrating B2B partner & B2C customer data

Customer 360 View

Combines booking, behaviour & engagement for full-journey visibility

Personalisation

Tailored B2C offers & custom B2B partner insights at scale

Governance & Compliance

Full GDPR adherence, data security & privacy by design

Advanced AI Analytics

Demand forecasting, dynamic pricing & AI-powered recommendations

EXTERNAL · GO-TO-MARKET DATA

Consumer Behaviour

Actual booking data reveals destinations, budgets & itinerary preferences

Consumer Intent

Search trend analysis identifies properties & transport gaining forward traction

Investment Managers

Targeted insights for investment advisors on travel sector strategy & allocation

Monetisation

License anonymised travel datasets to institutional & enterprise clients; upsell B2C

Go-To-Market Strategy

Phase 1	Q1–Q2 2026	Phase 2	Q3–Q4 2026	Phase 3	2027
Seed & Validate		Scale & Land		Expand & Deepen	
Launch beta with 4–6 ITA/OTA partners		Onboard first ITA/OTA clients		DMC vertical launch	
Integrate core Hotel, Flight, Cars, Activities and Avatar APIs		Launch AI co-pilot module		Crypto payment rails live, Experian integration	
Validate pricing model		Hospitality partnerships		Series A fundraising	

Key Partners: Amadeus · HotelsPro · Travolutionary · Pruvo · Israeli Hospitality Tech · Blockchain Payment Networks

Financial Projections

Metric	2026E	2027E	2028E
ARR	\$400K	\$2.8M	\$9.5M
Clients	12	85	290
Gross Margin	58%	66%	72%
EBITDA	-45%	-12%	18%
Headcount	8	22	55

Conservative projections based on comparable B2B travel SaaS growth benchmarks.

Team & Vision

Our Vision

"The Operating System for Travel" — the invisible infrastructure that powers every professional travel booking worldwide.

AI-First

Intelligence built into every feature, not bolted on as an afterthought, with true Agentic capabilities

Trust by Design

Security, reliability, and transparency embedded in the platform foundation

Global Scale

Multi-currency, multi-language, built for international expansion from day one

Partner-Centric

Our success is defined by our clients' growth, not just our own metrics

Management

Jon Peters

Founder & CFO/COO

Fintech and Deeptech entrepreneur and C-suite operator with 30+ years of experience building scaling across the US, Europe, and Asia at Natwest, SMBC, IDT, Cisco, TMX, and Alt Data Systems/Alqami.

Tyler Warren

Co-Founder & CEO

Former US Diplomat with 25+ years of experience in enterprise-level operating systems for data integration and decision-making at scale for the U.S. Government, and subsequently at Pragma Capital and LunaJet.

Josh Rosenthal

CTO & GTM

Founder/Co-Founder of Cyber and DevSecOps ventures including Aqua, Cloudsploit, and Synosys with multiple exits, with 20+ years experience in solution architectures, including cloud-based CSPM and CWPP.

Gaston Tchicourel

CPO and CDAO

Technology leader with 20+ years of experience in product development across finance, data, blockchain and AI/ML as ITC at World Bank Group, CTO at ConnectAmericas, Director at the IADB.
